OFFICE FURNITURE

Time for new conventions for tables.

How beautiful:

The tables of the DCOA series open up new possibilities for the organisation of seminars and meetings. Since table setup, takedown and transportation has once again been made a good deal easier, tables can be arranged spontaneously and flexibly in order, for example, to create space for productive team work.

It's sometimes worth it to look at things from another aspect.

DESIGNED

Countless studies show that people are healthier and more productive when they can change positions in their workspace. The innovative Airtouch® mechanism gives workers the ability to effortlessly, quickly and quietly adjust worksurface height, encouraging frequent workstyle transitions to stimulate body muscles and improve both cognitive and physical wellbeing.

3X

By incorporating standing into daily work life, individuals can reduce the risk of chronic disease and obesity.

"Simply by standing, you burn three times as many calories as you do sitting."

Airtouch

THE HEIGHT OF FASHION.

Airtouch can be adjusted single-handedly to any height on the fly, easily going from seated to standing, and back again. Simply set the adjustment gauge to meet typical worksurface weight load, then use the adjustment lever to raise and lower the worksurface. And because Airtouch doesn't have any electrical components, it can be used anywhere.

REFRESH YOUR WORKPLACE

Designed to work in almost any workspace, Airtouch is ideal for providing workers the flexibility to adapt worksurface height to their needs at a moment's notice. Whether it's in a freestanding or panel-based work environment, Airtouch can be used seated one minute, then raised to create a standing meeting place or to simply change posture the next.

GREAT SPACE. GREAT IDEA.

Flexible design
